ACHMMACH TIN PROJECT**

1.0 ACHMMACH TIN PROJECT

Kasbah Resources Limited (Kasbah) is pleased to announce the commencement of the Meknes Zone Indicated Resource (MZI) drilling programme at the company's Achmmach Tin Project in Morocco.

The MZI drill hole program aims to collect sufficient data for the estimation of a JORC Indicated Resource in the range of 1 to 2 Mt (from within the existing JORC Inferred Resource of 6Mt @ 0.9% Sn).

For and on behalf of the Board,

Wayne Bramwell
Managing Director

The information in this report is based on information compiled by Mr. Jeffrey Lindhorst a Member of the Australasian Institute of Geoscientists. Mr. Lindhorst is a full-time employee of Kasbah Resources Limited and has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2004 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr. Lindhorst consents to the inclusion in the report of the matters based on this information in the form and context in which it appears.

The potential quantity and grade of the target above is conceptual in nature. Currently there is insufficient exploration data to define an Indicated Mineral Resource and it is uncertain if further exploration will result in the determination of an Indicated Mineral Resource.
